PREFERRED JOB

Nephrologist

WORK EXPERIENCE

[03/2025 - present]

specialised doctor

IRCCS Ca' Granda Ospedale Maggiore Policlinico di Milano , Via della Commenda 15 - MILANO (MI) Italy
Business or sector: healthcare
Main activities and responsibilities: First-level medical officer, primarily involved in the management of kidney transplant recipients and related complications, both in the immediate postoperative period within the hospital setting and in the long-term follow-up in the outpatient setting.
The role also includes the monitoring and management of patients on the kidney transplant waiting list. As a member of the kidney transplant team, I am also responsible for the direct management of the organ allocation process from deceased donors.
In addition, I conduct clinical and translational research, primarily focused on kidney transplantation, and secondarily on nutrition in this patient population.

[02/2025 - present]

Advisor

Fresenius Kabi Italia - MILANO (MI) Italy
Business or sector: healthcare
Main activities and responsibilities: advisor for Fresenius-Kabi, for nutritional therapies and support in CKD patients

[01/2022 - present]

Clinical investigator

Roche (MI) Italy
Business or sector: healthcare
Main activities and responsibilities: Clinical investigator in Roche: COMMUTE-a BO42353 Crovalimab Clinical study protocol.

[01/2022 - present]

Clinical investigator

IRCCS Ca' Granda Ospedal Maggiore Policlinico di Milano - MILANO (MI) Italy
Business or sector: healthcare
Main activities and responsibilities: Clinical investigator in LIQUID consortium

[01/2021 - 01/2025]

Resident in Nephrology

IRCCS Ca' Granda Ospedale Maggiore Policlinico di Milano - MILANO (MI) Italy
Business or sector: healthcare
Main activities and responsibilities: During my specialization in nephrology, I focused on managing kidney transplant patients while deepening my understanding of both clinical and logistical aspects of transplantation. I gained valuable experience in post-transplant care, including immunosuppressive therapy, infection prevention, and long-term graft survival. I also dedicated time to studying the complexities of organ donation and allocation, collaborating with transplant teams to optimize recipient selection and ensure ethical, efficient organ distribution. Moreover, I evaluated patients on the waiting list, assessing eligibility and prioritizing cases based on urgency and compatibility. This approach significantly deepened my grasp of challenges for recipients and donors, equipping me with key skills to enhance outcomes.

[01/2021 - 01/2022]

Nephrology teacher

Accademia Mediplus - MILANO (MI) Italy
Main activities and responsibilities: Collaboration with Accademia Mediplus as a Nephrology tutor, aiding students in their preparation for the medical specialization exam

This CV contains confidential information collected by the Inter-universities Consortium AlmaLaurea. Full or partial reproduction and diffusion to third parties are strictly forbidden.
I hereby authorize the processing of the personal data contained in this CV in compliance with the European Regulation (UE) 2016/679.

[01/2020 - 01/2021]

Nephrology teacher

Peer4Med - MILANO (MI) Italy

Main activities and responsibilities: Collaboration with Peer4Med as a Nephrology tutor, aiding students in their preparation for the medical specialization exam.

[12/2016 - 06/2019]

Undergraduate Internship

Fondazione IRCCS Ca' Granda Ospedale Policlinico di Milano - MILANO (MI) Italy

Business or sector: healthcare

Main activities and responsibilities: Observation, practice, and learning of patient management in clinical reality.

[01/2018 - 01/2019]

Clinical and research internship

Nephrology, Dialysis and Transplantation, Fondazione IRCCS C - MILANO (MI) Italy

Business or sector: healthcare

Main activities and responsibilities: clinical and research internship under the mentorship of Prof. Piergiorgio Messa, at the Nephrology, Dialysis and Transplantation, Fondazione IRCCS Ca' Granda Ospedale Maggiore Policlinico

Acquired skills and achieved objectives: During my pre-graduate medical internship, I focused particularly on research in kidney transplantation. I explored immunological mechanisms, graft survival, and the impact of immunosuppressive therapies. I also studied factors influencing organ rejection and long-term transplant outcomes. This experience deepened my understanding of transplantation science and reinforced my interest in advancing research to improve patient care.

[01/2017 - 01/2019]

Sonography Tutor

Sono4You - MILANO (MI) Italy

Main activities and responsibilities: I joined the Sono4You project as a student initially, and as a tutor later. The main objective of this initiative is to teach ultrasonography to medical students through a peer-to-peer approach. (http://www.sono4you.org/)

EDUCATION AND TRAINING

[2013 - 2019]

Master Degree in Medicine and Surgery (M.D.)

Università degli Studi di MILANO

Town: MILANO

2nd level degree in Medicine and surgery

Final degree mark: 110/110 cum laude

EQF level: 7

NQF level: Single cycle degree (5/6 years)

Dissertation/thesis title: Cytomegalovirus Disease in Kidney Transplantation: Determinant Factors and Its Relationship with Clinical Outcomes

OTHER POSTGRADUATE STUDIES

[2025 - 2025]

DIPLOMA IN NEPHROLOGICAL CLINICAL ULTRASOUND

Duration: 4 months

Theoretical and Practical Preparatory Course for the SIUMB National Diploma in Ultrasound in Nephrol

Scuola Normale Superiore

Description:

The targeted use of Doppler ultrasound allows the diagnosis of 90% of renal pathologies. For this reason, in the era of visual medicine, a growing number of young physicians are approaching this non-invasive, reliable, and well-tolerated imaging technique with great interest. This cultural process must be supported by high-quality educational pathways and by multidisciplinary training on the most relevant topics in diagnostic and interventional nephrology. This school, through an intensive blended training program, aims to prepare young doctors in the use of this technique and its applications in nephrology. The week school is intended for residents and specialists from Italian universities, as well as practicing nephrologists. It combines traditional lectures and distance learning through a multimedia platform, along with practical hands-on training.

[2024 - 2027]

STUDENT GRANT

Duration: 36 months

PhD candidate in Clinical Research

Università degli Studi di MILANO

Description:

Admitted with project entitled: 'Caloric restriction (FMD) and its beneficial effects on inflammaging and kidney transplant outcome: a monocentric prospective randomized pilot study.'

This CV contains confidential information collected by the Inter-universities Consortium AlmaLaurea. Full or partial reproduction and diffusion to third parties are strictly forbidden.
I hereby authorize the processing of the personal data contained in this CV in compliance with the European Regulation (UE) 2016/679.

This research project investigates the impact of caloric restriction, specifically the fasting mimicking diet (FMD), on kidney transplant patients and graft outcomes. It will assess the effects of FMD during the first post-transplant year, evaluating its safety and potential benefits for patient and graft survival. In collaboration with the Icahn School of Medicine at Mount Sinai, the study leverages expertise in translational research and transplant immunology. The primary aim is to determine FMD's safety, while the secondary goal is to explore its metabolic and immunological benefits. Ultimately, this project seeks to highlight the importance of dietary interventions in transplant patient management, challenging the reliance on pharmacological treatments alone.

[2023 - 2024] **Duration**: 16 months

Post-Doctoral Fellow

Icahn School of Medicine at Mount Sinai

Description:

During my time as a post-doctoral fellow at the Icahn School of Medicine at Mount Sinai, New York, I focused my research on kidney transplantation, gaining expertise in both clinical and translational studies. I refined my skills in statistical analysis, scientific writing, and research methodologies, contributing to original articles, abstracts, and grant proposals. Immersed in a dynamic academic and research environment, I deepened my understanding of transplant immunology and the metabolic aspects influencing graft survival. This experience further fueled my passion for scientific research, reinforcing my commitment to advancing knowledge in kidney transplantation. Additionally, I had the opportunity to collaborate with leading experts in the field, enhancing my ability to design and conduct impactful studies. This period also significantly improved my proficiency in English, allowing me to effectively communicate and engage in international scientific discussions.

[2021 - 2025] **STUDENT GRANT**
Duration: 48 months

Resident in Nephrology

Università degli Studi di MILANO

Description:

Graduated with a first-class honors degree (70/70 magna cum laude) in Nephrology at Università degli Studi di Milano, disserting the thesis: "FASTING-MIMICKING DIET PROTECTS MICE FROM ACUTE AND CHRONIC KINDEY INJURY BY REDUCING MACROPHAGE RECRUITMENT".

During my nephrology specialization, I focused on kidney transplantation and nutrition in kidney disease from clinical, academic, and research perspectives. I gained experience in managing transplant patients, optimizing immunosuppressive therapy, and studying graft survival. Simultaneously, I explored the role of nutrition in renal disease, investigating dietary strategies to improve outcomes. My research deepened my understanding of metabolic and immunological aspects of transplantation.

[2020]

Registration with the medical professional board.

Medical Association of Milan

Description:

It is certified that Dr. PAOLO MOLINARI, born in MILAN (MI) on 22/12/1994, graduated in Medicine and Surgery from the University of Milan on 29/07/2019, qualified for professional practice in the 2nd session of the year 2019 at the University of Milan, you find regularly enrolled in the Register of Medical Surgeons of Milan from 07/04/2020 to n. 47189
