

The background of the entire page is a photograph of the Gothic architecture of a cathedral, likely the Duomo di Milano. The image shows intricate stone carvings, flying buttresses, and a tall spire topped with a golden statue. The sky is a clear, bright blue. A white rectangular box is overlaid on the left side, containing text. A green rounded rectangle is at the top left, containing a link. At the bottom, there is a red silhouette of a city skyline.

PRESENTATION LETTER

DEAR COLLEAGUES AND FRIENDS,

The Italian team of colorectal surgeons is glad to invite you to the 14th Annual European Pediatric Colorectal and Pelvic Reconstruction Meeting, that will take place in Milano from 25th to 27th October 2023.

Milano is the second largest city in Italy, located in the North of Italy, and represents the perfect balance between history, modernity and future. It is considered one of the world's capitals of fashion and design, as well as a financial hub, being at the same time a city of culture and history, with spectacular museums and some of the most monumental churches. Milano's architecture is the perfect example of ancient world meeting modern urbanity. Whether you're looking to explore Leonardo's art and creativity, feel the charm of opera and ballet at Teatro alla Scala, shop in the boutiques of the most famous fashion and luxury brands at Quadrilatero d'Oro - the Fashion District, and taste delicious foods in local and international restaurants, Milano is the right place to visit.

The 14th Annual European Pediatric Colorectal and Pelvic Reconstruction Meeting, with its innovative programme, will offer the perfect chance to meet international experts in pediatric colorectal surgery, and to share ideas and knowledge to improve the care of our patients with anorectal malformations and Hirschsprung disease starting from the discussion of clinical cases. This is the innovation we want to bring in this edition, such as a return to the initial goal of this meeting.

The Congress will be held under the patronage of eUROGEN (European Reference Network for rare or low prevalence Urogenital diseases), ERNICA (European Reference Network for rare or low prevalence Inherited and Congenital Anomalies), the European Pediatric Surgeons' Association (EUPSA), the World Federation of Associations of Pediatric Surgery (WOFAPS), Società Italiana di Chirurgia Pediatrica (SICP), the Department of Clinical Sciences and Community Health of Università degli Studi di Milano and Ordine delle Professioni Infermieristiche Milano - Lodi - Monza e Brianza (OPI Milano - Lodi - Monza e Brianza), Fondazione IRCCS Ca' Granda Ospedale Maggiore Policlinico. We hope that many of you will be able to join us in Milano and have a wonderful Experience in Italy!
